Date: May 1st, 2015

Re: New manufacturing locations and order processing information
Thermo Scientific™ AcroMetrix™ Quality Controls

Dear AcroMetrix customer,

To better serve our customers, we have moved our AcroMetrix operations located in Benicia, California, to our newly constructed state-of-the-art facility in Fremont, California. We are excited about this move because we have integrated AcroMetrix into Thermo Fisher Scientific's broader quality controls portfolio, enabling us to strengthen and expand our offering to our customers.

These changes will not affect the product quality or the manufacturing processes and procedures of AcroMetrix products. However, effective May 18, 2015, branding will begin to transition from Life Technologies labeling to Thermo Scientific. Distribution and customer support may also change for our customers in Europe. If you are currently purchasing from an AcroMetrix distributor, ordering processes will not change.

Please take a moment to update ordering information in the following regions:
