

QuantiGene Singleplex miRNA Probe Sets

About QuantiGene Singleplex miRNA Assay

MicroRNAs are a major component in the regulatory circuitry that underlies the development and physiology of complex organisms. The QuantiGene miRNA Assay provides direct measurement with excellent specificity for mature target miRNA. All miRNA probe sets on this list have been functionally validated for specificity, cross-reactivity towards closely-related family members, and sensitivity. The ability of the probe to recognize miRNAs across species is indicated. New custom probe sets can be designed with a minimum order quantity of 400 reactions, however the new probe sets will NOT be validated.

Name	Species				Sequence	Probe Set Cat. No.	Control Cat. No.	Alt Name
	Human	Mouse	Rat	Other
