pLATE vectors ~4.5 kB

Plasmids:
- pLATE11
- pLATE51
- pLATE52

Genetic Elements:
- T (T7 promoter)
- nptI (nptII gene)
- lacZ (beta-lactamase gene)
- EcoRI (restriction enzyme recognition site)
- BamHI (restriction enzyme recognition site)
- P(A61) (replicator origin of Plasmid pA61)
- lacIg (lactose repressor gene)
- P(r) (T7 promoter)
- npt (neomycin phosphotransferase gene)
- ATG (start codon)
- RBS (ribosome binding site)
- T7 (T7 terminator)
- mBT1 (methylation binding site)
