The first step to recovery is reliable drug testing

Helping Drug Courts
What customers are saying

"Thermo/Fisher ACT was able to adequately access our needs and put forth a solution that had a positive impact on our program. Not only was it more effective than the competitor but the efficiency of your solution saved us 15-20% off our testing budget."

David Ramage – Director – Los Angeles County Drug Court

"From the start when introduced to the new machine INDIKO, the transition has been very smooth and without problems. From the installation of the machine, the set-up and the training we received, we could not have asked for more."

David Ramage – Director – Los Angeles County Drug Court

"The system is very user friendly. I like that it sends the results to clients via email and trees up time for me and other lab employees to keep testing."

Sue Cox - Compliance Consortium Corporation – TX

"All the products for drugs of abuse testing are extremely reliable, consistent and reproducible. We not only like the products but the customer support is phenomenal. Their product is VERY reliable and their shipments arrive on the days they tell us they will be here. Thermo Fisher Scientific is a big part of our laboratory’s success in being able to have a consistent turnaround with reporting to our clients."

Carol Bates – Laboratory Manager – MODOC Toxicology Laboratory

From the start when introduced to the new machine INDIKO, the transition has been very smooth and without problems. From the installation of the machine, the set-up and the training we received, we could not have asked for more."

David Ramage – Executive Director – Shelby County Community Connections

"I love Paracelsus! What I like most is that it hooked up for drug testing with DCCM which you guys also do. It’s phenomenal! I would like to learn more about it. I just love it. I wouldn’t trade it for anything."

Tracy Swafford – 17th Circuit Drug Court – MS
Our comprehensive selection of collection devices and screening assays for our Thermo Scientific™ Indiko™ and Indiko Plus bench-top analyzers are customizable to your drug court’s needs. Immunoassay-based screening increases accuracy and specificity of the test especially around the drug cutoff concentration when compared to instant, point-of-care devices. Thermo Scientific Indiko and Indiko Plus systems offer an extensive menu of urine and oral fluid immunoassays for drugs of abuse and specialty testing. Fully automated and self-contained, these analyzers provide a cost effective solution with a smaller footprint than the typical clinical analyzer. The Oral-Eze® Oral Fluid Collector takes the guesswork out of sample collection with an indicator window that turns blue when a sufficient quantity of sample is obtained for processing thus reducing the need for repeat collections. Oral fluid is less invasive to collect and less prone to sample adulteration and dilution than urine. In addition, it can be collected virtually anywhere including during routine field visits or at regular check-ins.

Paracelsus, a web-based laboratory information system, provides the tools needed to effectively manage your drug testing program in the lab and from your laptop.

- Access 24/7
- Chain of custody documentation
- Random color-coding tool
- Remote data entry
- Bar-coding capabilities
- Customized reporting

DCCM™ (Drug Court Case Management) offers tools to manage both client and administrative needs.

- Scalable solutions
- Unique identifiers: “one name – one number”
- User-based security

We recognize drug testing is an important part of your drug court treatment program. We offer a complete solution to support your drug testing needs and provide you with the tools to successfully achieve:

- Increased productivity
- Cost reduction
- Reliable and accurate test results
- Effective client management

Solutions for On-Site Drug Testing

Our comprehensive selection of collection devices and screening assays for our Thermo Scientific™ Indiko™ and Indiko Plus bench-top analyzers are customizable to your drug court’s needs.
