c-erbB-2 / HER-2 / neu
Catalog # RM-9103-S0, -S1, or -S (0.1ml, 0.5ml, or 1.0ml)
Catalog # RM-9103-R7 (7.0ml)

INTENDED USE:
- **For In Vitro Diagnostic Use:** This product is intended for qualitative immunohistochemistry with normal and neoplastic formalin-fixed, paraffin-embedded tissue sections, to be viewed by light microscopy.
- **Description:** c-erbB-2 is a receptor tyrosine kinase of the c-erbB family. It is closely related structurally to the epidermal growth factor receptor. c-erbB-2 oncoprotein is detectable in a proportion of breast and other adenocarcinomas, as well as transitional cell carcinomas. In the case of breast cancer, expression determined by immunohistochemistry has been shown to be associated with poor prognosis.
- **Expected Staining Pattern:** Cell membrane
- **Positive Control:** breast CA
